1. #6600-86 KEYPAD & FINGERPRINT LOCK WITH MECHANICAL KEY

- Fingerprint + keypad + mechanical key
 - *Exquisite appearance , Rational structure , Safe & reliable fingerprint electronic lock
 - *Suitable for villa , office , military area and amusement places
 - *Many ways of high-security unlocking methods
 - *Independent electronic input-output management system: Password circuit + fingerprint circuit are insulated. insure to use safely
 - *Adopt traditional ball door lock hole , no need to make another hole ,very easy to install
 - *Use 9V extra power don't be worry about there is lacking of power
 - *Can use together with door magnetic switch link with monitoring system
 - *Reserve many kinds of interface which can connected with hotel management system
 - *Battery life time: exceed 15,000 times under normal use
- Unlock ways :
- standard : Fingerprint + keypad
- substitute ways : tag + mechanical key + mobile phone remote control
- 1、 Adopt international advanced sensor technology, ensuring the reliable quality.
 - 2、 Upper Slid cover reader protection. Anti-moisture, anti-dust, is suitable for using under all weather.
 - 3、 Using 4 X1.5V standard alkaline batteries. Energy saver design for extending the battery life
 - 4、 User can change handle freely according to his/her favorite.
 - 5、 Battery replacements easily, just like the battery replacement for mobile phone, 10 seconds for all the procedure. Save time and energy
 - 6、 Soft music tone reminding and light indication, more fun and kindness
 - 7、 Capacity for 150 fingerprints users, especially suitable for children and the old to use.
 - 8、 Free rotating handle to avoid violent damage when it keeps racing state.
 - 9、 Special lock body with "nanotechnology" surface, updated, noble durable
 - 10、 Pure stainless steel mechanical rotating structure enable for using more than 10 years

2. #6600-89 FINGERPRINT LOCK (FULL PURE STAINLESS-STEEL)

- *Exquisite appearance , rational structure , safe & reliable fingerprint electronic lock
- *Suitable for villa , office , military area and entertainment places
- *High security pure stainless material
- *Independent electronic in-out management system insure use safely
- *Can add door magnetic monitoring function
- *Reserve many kinds of interface which can contact with home intelligent management system
- *Battery life : over 15000 times to open door under normal condition
- - 1、 Pure stainless steel lock cover and European standard mortise, never rust and fade.
 - 2、 Designed by Germany famous stylist, faddy and fashion
 - 3、 Using 1.5V 4 standard alkaline batteries. Special power design to extending the battery life
 - 4、 user can change handle freely according to its favorite.
 - 5、 Easy battery replacement, just like the mobile phone, 10 seconds for all the work. Save time and energy
 - 6、 Can set up 150 pieces fingerprints, powerful quality is specially suitable for old and children.
 - 7、 Free rotating handle when not working which avoid violent damage.
 - 8、 pure stainless steel mechanical rotating structure enable use more than 10 years

Latch choice:

1.Single latch.

Or 2.Four latch

Or 3.Five latch

3. #6600-92 FINGERPRINT & KEYPAD LOCK WITH MECHANICAL KEY AND TAG

- Fingerprint + keypad + tag + mechanical key
 - *Exquisite appearance, Rational structure, Safe and Reliable
 - *Suitable for villa , office , military area and amusement places
 - *Many kinds of high-security unlocking methods Independent electronic in-out management system
 - *Can add open record function,1000 times rolling type for records
 - *Easy to learn , use and install
 - *Use 9V extra power, don't worry about there is lacking of power
 - *Can add door magnetic function, standby many kinds interface to connect with varies intelligent interface system.
- Unlock ways:
standard: fingerprint+code
reserve: tag+ mechanical key+mobile phone remote control
- 1、 Adopt international advanced induce module to ensure the reliable quality
 - 2、 Upper Slid cover reader protection. Anti-moisture, anti-dust, is suitable for using under all weather.
 - 3、 Using 1.5V 4 standard alkaline batteries. Energy saver design for extending the battery life
 - 4、 User can change handle freely according to his/her favorite.
 - 5、 Battery replacements easily, just like the battery replacement for mobile phone, 10 seconds for all the procedure. Save time and energy
 - 6、 Soft music tone reminding and light indication, more fun and kindness
 - 7、 150 fingerprint keys with strong quality, suitable for children and elder
 - 8、 Free rotating handle to avoid violent damage when it keeps racing state
 - 9、 Special lock body with "nanotechnology" surface, updated, noble durable
 - 10、 Pure stainless steel mechanical rotating structure enable for using more than 10 years
 - Bicolor: Black/ gold steel
 - Bicolor: Black/ silver steel
