2X MDM – Mobile Device Management Manage, Secure and Track

2X MDM allows you to enhance employee well-being and productivity while keeping control over mobile devices and reduce the risk of corporate data loss. 2X MDM supports and manages both company and employee-owned devices, ensuring compliance with corporate security policies.

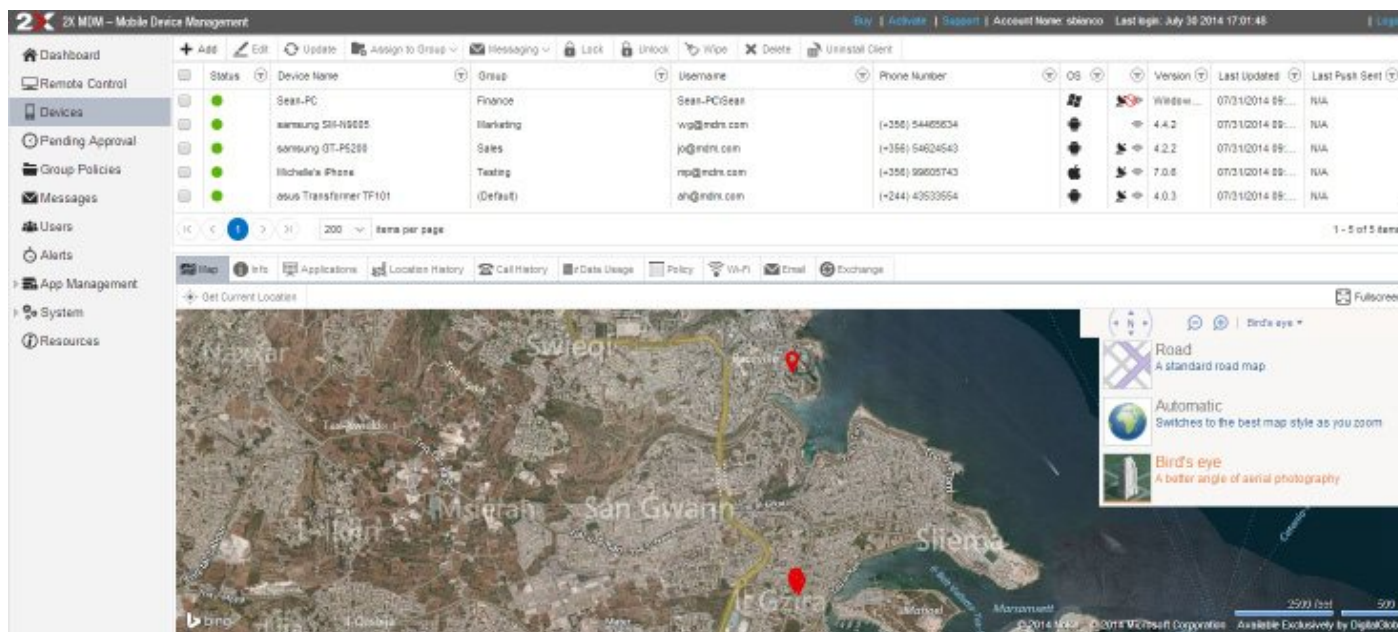

10 Key Benefits of 2X MDM

1. Affordable mobile device management at last
2. Easy to use, purchase and scale
3. Hosted and on-premises editions
4. Fully comprehensive Android devices remote control
5. Remote lock and wipe, even by SMS
6. Enforce corporate password policies
7. Find, track and view full location history
8. Monitor for malware and inappropriate apps
9. Mass deploy, whitelist, blacklist apps
10. Configure corporate email & Wi-Fi settings remotely

With 7 million dollars' worth of mobile phones being lost every day in the United States and over 2,000 devices being stolen in the UK each day, the potential costs and risks of sensitive data falling into the wrong hands can be considerable.

- Provide feature-rich corporate email with control over stored attachments and mail.
- Manage Android devices remotely to be in control of your data at all times.
- Respect employees' privacy fully with Office Hours options.
- Manage installed apps and ensure productivity and security.
- Reduce configuration setup time with centralized management for Wi-Fi networks & emails.
- Prevent corporate data loss by remote locking and wiping your mobile devices when lost and enforcing password policies.
- Track mobile devices and log location history.

Securing Your Data – Remote Lock or Wipe Devices

If a device is lost or stolen, 2X MDM can remotely lock or wipe the device and its SD card to avoid unauthorized use, even if it isn't connected to the internet, or just delete corporate email and any stored attachments. Enforce a strong password policy remotely and set minimum password length and time lapse before device auto-lock.

Manage Apps - Monitor for Rogue Apps & Mass Deploy

Administrators can review all the apps that are installed on the devices from a single screen and remove any inappropriate apps that affect employee productivity and drain data plans with a few mouse clicks. Mass Deploy corporate apps to devices without using the App Store or Google Play.

Find & Track Devices & Supervise Staff Routes

2X MDM stores the current location of all devices and keeps detailed logs of where the devices and employees have been, with the option to restrict control to office hours only. All device locations are shown with their full address using Bing Maps.

Unparalleled Android Manageability

2X MDM allows administrators to manage Android smartphones and tablets remotely, with full management capability over files, camera, folders and SMS on any Android device.

Remotely Configure Corporate Email

2X MDM incorporates the most popular commercial Android email client - AquaMail, allowing administrators to remotely configure corporate email and retain control of stored attachments and mail. Companies can now delete all corporate emails as well as the attachments that are stored on the device when an employee leaves the company. 2X MDM provides Enterprise-style features for SMBs at a fraction of the cost and administration effort.

Thousands of companies worldwide rely on 2X
